

OPEN POSITION

Welding engineer

Are you passionate about automotive? Would you like to support and optimise running production? Do you want to work for high-end customers like BMW, Audi, Daimler, Rolls Royce, etc. and with a very complex unique technology? If yes, our position of Welding Engineer can be perfectly fitting to you!

Your area of responsibility

You will be part of Engineering team of 7 employees, who are supporting both running production and new projects with the specialization in Welding. You will have a daily contact with Production, Quality and Maintenance colleagues.

Further responsibilities will be:

- Monitor the welding quality and material quality and support production in solving welding problems according to welding regulations and customer requirements,
- Coordinate and standardize welding tools and fixtures, including storage,
- Lead the complaints related to welding,
- Train employees in production of necessary,
- Lead innovative projects in welding technology,
- Plan and coordinate the manufacture of prototypes and fixtures for welding techniques,
- Continuously optimize and develop welding techniques, surface technology (technical cleanliness, degreasing and cleaning, if necessary pickling passivation)

Your profile

We see you with a technical degree in Mechanical Engineering, Industrial Engineering, or comparable studies with the focus on Welding or alternatively technically oriented apprenticeship in connection with some years of equivalent work experience. Ideally, we expect that you have additional qualification as a welding engineer.

We expect that you have 3-5 years practical experience as an engineer, supporting serial production. You must have experience in Aluminium MIG Welding, Hand and Robot welding.

You should be experienced to built up welding lines from scratch and it will be a bonus if you are skilled in using Vitronic or other visuell controlling systems.

Applicants with experience from the automotive sector and with insight into aluminium are preferred.

On the personal side you would like to work in a team with international context, have strong communication skills and commitment.

Strong language skills required in both English and Danish. German as language is a plus. Knowhow to Microsoft Office Package is expected.

We are offering:

We are offering a position with the access to unique technologies and with the broad range of freedom.
